

**NEW**  
4-head machine with  
30% more efficiency

**<1% O<sub>2</sub>**

**Stable  
underpressure  
in finished can  
( ≤ 850 mbar )**

**INDOSA matic 127-4 proVac**  
**INDOSA matic 153-4 proVac**

- 4 process heads for evacuate, gasify and seam cans
- Perfect system to produce evacuated, gasified and seamed cans with highest security standards for the best protection of your high-quality products
- **Worldwide unique SCS (Single Can Security) technology**
  - All process sequences are independently controlled and checked for each
  - Only successfully terminated sequences allows the next process step to be triggered

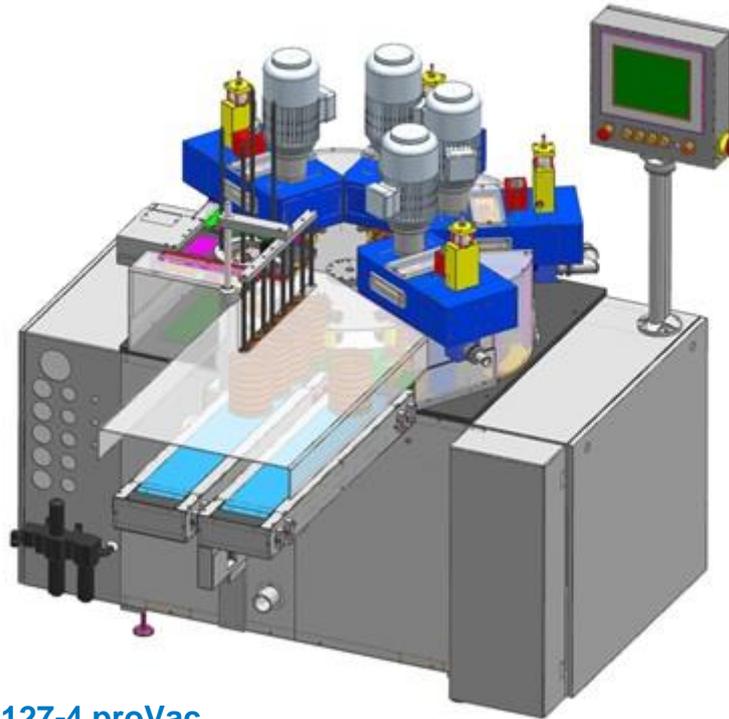

**Maximal capacity:** 30 cans/min  
Output depends heavily on:  
product, residual oxygen content and vacuum pump

**Can range:** Ø 73 mm - Ø 127 mm, height: 50 mm - 190 mm  
Ø 73 mm - Ø 153 mm, height: 50 mm - 190 mm  
Easy changeable in minutes

**Can type:** Tin cans, aluminium cans or gas tight composite cans

**Lids:** Tin and aluminium lids (also ring-pull, easy-open, etc.),  
with or without (!) evacuating cams

**Low residual oxygen content:** Residual oxygen adjustable <0.5% by setting the vacuum point  
gassing with N<sub>2</sub> or CO<sub>2</sub>  
Low residual oxygen setting reduces process speed (logarithmic!)

**INDOSA matic 127-4 proVac**  
**INDOSA matic 153-4 proVac**

This new technology combines all proven INDOSA advantages with the latest safety rules.

- 30 cans per minute
- No pre-clinching needed
- Stable value < 1 % O<sub>2</sub> inside can after finished process
- Stable adjustable pressure inside can after finished process
- Modular system
- No can collapsing possible
- No special vacuum lids (with dimples) needed
- Definite Nitrogen consumption
- Low Maintenance
- Safety system for permanent vacuum and gassing process monitoring
- INDOSA Single Can Security: Definite Pressure, definite O<sub>2</sub>-content and checked double-seam, controlled for each can
- 1 Compact Machine for evacuating, gasifying and seaming
- Different can-diameters and heights are processed on the same machine, changed in minutes

**THE safe and compact solution for  
pharmaceutical products, baby formula or coffee in cans!**
